2. Statement of Need

The Colorado Department of Human Services (CDHS) oversees the management and administration of the Supplemental Nutrition Assistance Program (SNAP). SNAP is the most extensive nutritional assistance program in the nation, and CDHS is committed to providing the program to those individuals that are eligible and in need of this key strategy for fighting food insecurity in Colorado. CDHS is also working to increase public awareness by reaching out to households that may be eligible for SNAP benefits. The main approach CDHS has is to form partnerships with strategic agencies (SNAP Outreach Partners) that have the experience and training to provide SNAP application assistance. SNAP Outreach partners maintain strong, trusted relationships with a range of Community-Based Organizations (CBOs), referred to as subrecipients in this plan, that are uniquely positioned to reach communities across the state who may otherwise be missed by traditional outreach efforts. Each CBO brings specialized programs and deep community connections that allow for more targeted and effective engagement. These partnerships play a critical role in ensuring that eligible individuals and families, regardless of location, language, or life circumstances, are aware of and able to access SNAP benefits

According to Feeding America, in 2023, one in eight Coloradans are struggling with hunger. There are over 744,950 people facing hunger in Colorado, with just under 172,540 of them being children.¹ On average, between 2021 and 2023, 11% of Colorado kids lived in households that were food-insecure at some point during the year. From 2021 to 2023, the cost of living increased by 6.77% and between 2023 and 2024 the price of food rose to 2%.² The share of Colorado households with kids where children were not eating enough because food was unaffordable ranged from 18% in June 2020 to a high of 37% in December 2021-January 2022.³ These numbers underscore the ongoing and urgent need to strengthen food assistance programs like SNAP and expand outreach efforts across the state.

Disparities exist for people of color as well as those living in rural and frontier areas. Those who identify as American Indian Alaska Native, Black or African American, Multi racial, or Hispanic, as well as individuals born outside of the U.S., and people living in rural and frontier areas are more likely to experience poverty than the general population of Colorado. Veterans, college students, and older adults are experiencing food and housing insecurity at rising rates. These populations have some unique needs that should be prioritized in the FFY26 plan. To be effective this federal fiscal year, SNAP Outreach efforts will need to use innovative strategies and engage with broad range subrecipients to better serve these communities.

There has been an increase in SNAP enrollment from 584,416 in 2024 to 615,319 Coloradans are enrolled in SNAP in 2025⁴ While SNAP participation among low-income individuals increased

⁴ SUPPLEMENTAL NUTRITION ASSISTANCE PROGRAM: NUMBER OF PERSONS PARTICIPATING

from 78% in 2022 to 84% in 2023 there is still a gap in eligible individuals and those receiving benefits.⁵ With the increase in inflation, and the resulting increase in food costs, programs like SNAP are even more important to those in need. CDHS understands that the nutritional and economic benefits of SNAP participation will strengthen the lives of Coloradans. We will continue our mission to provide assistance to those people who need the food support offered as part of SNAP. SNAP Outreach is a collaborative partnership. CDHS will continue to join efforts with counties, community partners, advocates, and other agencies to provide outreach throughout Colorado communities.

3. Outreach Plan Summaries

Executive Summary

The Colorado Outreach Plan for Federal Fiscal Year (FFY) 2026 has six main objectives that will be met through two partner agencies: Benefits in Action and Hunger Free Colorado. To ensure the most vulnerable populations are targeted and that we are aligning with FNS SNAP Outreach priority areas, outreach will be conducted and prioritized to include hard to reach populations such as Able-Bodied Adults without Dependents (ABAWDS), older adults, students attending institutions of higher education, under-employed households, veterans and communities of color. Both outreach partners are expanding in FFY 26 upon previous years' successful partnerships with varied CBOs to ensure we accomplish our goal of reaching and providing adapted services to all SNAP eligible populations in Colorado. We expect our work to be community-informed and driven by community events, partnerships with health centers, food banks, churches, higher education institutions, counties, and organizations devoted to serving the community, among others. Additionally, we will ensure the program design, language, and structure authentically meets the needs of the SNAP eligible community, and that we are reaching those who have been marginalized and most impacted by food and nutrition insecurity.

CDHS continues to remain committed to our outreach partners and sub-recipients by providing many virtual technical assistance sessions and other in-person engagement opportunities to ensure we can continue to help communities navigate the SNAP program. CDHS is ensuring all partners and sub-recipients are trained in telephonic application assistance and monitor these processes regularly to ensure accuracy in the recordings. We expect to continue offering telephone application assistance and will continue to have opportunities for in-person outreach and application assistance in FFY 26. Last year we made a request in the plan for Outreach Partners and subrecipients to make Change Reports when SNAP enrolled participants make a request. This year, change reports will remain a key component of the plan. We will also set a goal and track the number of change reports submitted for FY26. This effort will help SNAP-enrolled Coloradans maintain their benefits more consistently, while also reducing the volume of calls counties receive for these requests. PEAK Pro provides our partners and subrecipients with a streamlined tool to assist clients in submitting change reports efficiently.

CDHS remains committed to expanding on-the-ground application assistance in rural areas and with other hard-to-reach populations. As part of this effort, CDHS is encouraging larger partner agencies to engage and support smaller subrecipients, especially in areas where there has been little to no direct SNAP outreach. This strategy aims to build local capacity, strengthen community trust,

⁵ SNAP Program Access Index | Food and Nutrition Service. (2023). Retrieved from [www.fns.usda.gov website: https://www.fns.usda.gov/snap/qc/pai](https://www.fns.usda.gov/snap/qc/pai)

and ensure that more eligible individuals in hard-to-reach communities can access and maintain SNAP benefits.

The five main objectives of the 2026 SNAP Outreach plan are:

1. Provide telephonic and in-person application assistance to submit 26,106 SNAP applications, recertifications, and periodic reports. In addition, assist with the submission of 2,189 change reports.
2. Leverage data and innovative outreach strategies to identify and engage potentially eligible individuals within hard-to-reach populations.
3. Coordinate closely with county SNAP offices and relevant FNS programs to ensure that eligible individuals are enrolled in SNAP or maintain continuous enrollment, while also increasing awareness of other available federal programs.
4. Deliver comprehensive training to community partners in targeted regions on SNAP outreach, basic eligibility criteria, application assistance using PEAK or paper forms, and effective methods for evaluating and reporting program outcomes.
5. SNAP Outreach Partners will continue to partner with at least five sub-recipients across the state in FFY 2026 to expand SNAP outreach, increase program impact, and enhance access to nutrition assistance for eligible populations.
6. SNAP Outreach Partners will work collaboratively with CDHS to explore and develop innovative strategies that promote the long-term sustainability of the SNAP Outreach program, including identifying diversified funding sources and partnership opportunities.

Application assistance will continue to consist of providing information on the application process, basic SNAP pre-screening and eligibility criteria, where to apply, and guidance to dispel common misconceptions about the program that may contribute to individuals choosing not to seek assistance.

County offices will benefit from the SNAP Outreach Program by receiving more complete applications with supporting documentation and decreased general program questions. Outreach partners will be able to provide clients with basic verification requirements and collect paperwork that may be needed. SNAP Outreach partners will also provide the ability to do Change Reports. This will decrease the county workload in helping clients to change personal information such as, name, phone number, email, etc., when clients need to make a change. Additionally, having outreach partners who are dedicated to assisting those who may have already failed utilizing the online PEAK or another method, increases the likelihood that SNAP participants will remain on SNAP and experience fewer disruptions, thus also benefiting county workloads.

To increase SNAP outreach throughout Colorado, both partners will provide outreach training and funding to subrecipients. We have set a state goal for each partner to work with at least five subrecipients, but this goal will be largely exceeded in 2026. It is projected that both partners will work with more than 57 subrecipients. The partners will conduct ongoing technical assistance sessions to empower other partner agencies to convey the advantages of the SNAP program to potentially eligible persons within their own communities. Extending the range of SNAP outreach to other organizations will ensure that SNAP information and application assistance (either in-person or over the phone) is being provided to a broad range of individuals and that we are reaching all SNAP eligible populations.

Outreach efforts will be measured utilizing reports from Colorado's online application system, PEAK. The PEAK reports will consist of the following information:

- Number of new applications submitted.
- Number of change reports when adding a program submitted.
- Number of change reports, all other changes, submitted.
- Number of renewals/recertifications submitted.
- Number of periodic report forms submitted.

In addition to the routine reports available through PEAK, outreach partners in partnership with CDHS will continue to utilize the electronic monthly reporting and evaluation system implemented in FFY 24 to make sure key data is being gathered to measure program outcomes. Partners are asked to include information about training, working with subrecipients, outreach attendance at events, distribution of SNAP informational materials, and collect success stories. Here are examples of the information that is collected:

- Number of SNAP in person and telephonic signature applications completed.
- Number of Change Reports and recertification completed.
- Number of periodic report forms submitted.
- Number of SNAP outreach materials distributed.
- Number of outreach presentations, SNAP education and/or training completed.
- Number of events where basic SNAP information was shared with the public.
- Number of subrecipients and the hard-to-reach populations they serve.
- Number of clicks and engagement in social media for outreach efforts.
- Qualitative insights into how SNAP outreach impacts individuals.

This information will be used to not only measure the effectiveness of outreach efforts, but also to determine trends in program access and where additional efforts may need to be targeted.

To support the achievement of Goals Two and Six of the plan, CDHS will focus this year on developing a data dashboard and an evidence-based portfolio. These tools will enhance program monitoring and provide outreach partners with objective, actionable insight highlighting which strategies are most effective and identifying areas for improvement to better achieve program outcomes. The evidence-based portfolio will consolidate key information about SNAP Outreach efforts in Colorado, as well as best practices and implementation strategies from other states. This resource will also support partners in pursuing additional funding and long-term program sustainability.

Finally, the CDHS SNAP Outreach team, along with staff from SNAP Outreach partner organizations, will continue to actively participate in the State Nutrition Action Council (SNAC) and other collaborative initiatives across Colorado. These efforts are aimed at fostering strong, trust-based relationships among Food and Nutrition Service (FNS) programs, promoting coordinated referrals, and ensuring efficient cross-program collaboration while minimizing duplication of efforts.

For FFY 26, Colorado will work with two SNAP Outreach providers: Benefits in Action (BIA) and Hunger Free Colorado (HFC). CDHS and outreach partners remain committed to providing SNAP outreach to all SNAP eligible individuals in Colorado. All outreach partners and their subrecipients have trusted ties in the community and capacities to provide in-person application assistance when requested, making our outreach model flexible and responsive to community needs.

Benefits in Action

The Benefits in Action SNAP Outreach Plan for the period of October 1, 2025, through September 30, 2026, will focus on supporting individuals who face barriers to accessing SNAP benefits. Services will include assistance with submitting initial applications, change reports, recertifications, and periodic reports. Outreach efforts will prioritize individuals who are historically underserved or who encounter obstacles such as limited transportation, lack of information or understanding about program eligibility, or other systemic and logistical challenges.

During this period, Benefits in Action anticipates submitting approximately 6,109 SNAP

applications. Additionally, affiliated partner organizations (subrecipients) are projected to submit 4,855 SNAP applications over the same timeframe.

Key strategies include:

- Provide in-person and telephonic SNAP application assistance.
- Collaborate with county SNAP offices. By working closely, BIA aims to support human service eligibility staff by providing application assistance and reducing churn related to household benefits ending and needing to return to their county office.
- Utilize data and innovative strategies for targeted SNAP outreach, activities, education, and marketing.
- Collaborate with School Districts to reach more SNAP eligible families.
- Conduct targeted outreach activities for hard-to-reach communities and underserved counties throughout the state. These activities include co-location at community organizations serving the targeted communities and hiring bilingual staff who speak the language of the targeted communities.
- Train community partners and subrecipients on effective SNAP outreach techniques. The Senior Manager of Navigation meets with subrecipients monthly to discuss and share ideas and problem solve.
- To expand their reach, BIA will continue partnerships and provide oversight and support to at least ten sub-recipients.
- Create and distribute outreach materials in multiple languages and employ bilingual navigation staff.
- Collaborate with other FNS/Federal programs and maintain their robust in-house referral process. These programs include WIC and several nutrition programs that BIA deploys from their food delivery program. BIA supports Summer EBT, meals for students, and older adult commodities.

Benefits in Action (BIA) will use the CDHS-approved monthly outreach reporting form to track key metrics, including the number of eligible individuals reached, events attended to provide SNAP education and information, total outreach contacts made, and SNAP applications submitted. To support accurate and comprehensive data collection, BIA will utilize multiple sources, including PEAK Pro reports, internal paper application tracking, and reports generated from the Benefits in Action database. In addition, BIA receives monthly reports from its subrecipients and will ensure that all required data is consistently collected and submitted in alignment with CDHS reporting guidelines. This multi-source approach will help BIA monitor outreach performance, assess impact, and inform ongoing program improvements.

Program Objectives for FY 2026:

1. By September 30, 2026, submit at least 10,964 SNAP applications to Colorado county human services offices. This application goal includes both direct in-person and telephonic application assistance completed by BIA and sub-recipient agencies.
2. By September 30, 2026, BIA and their subs will submit 541 change reports.
3. By September 30, 2026, provide SNAP information to at least 18,000 SNAP recipients or potential recipients.
4. By September 30, 2026, attend 510 SNAP information and outreach events.
5. Commit to provide oversight and monitoring for at least ten subrecipients including ECHO, The Fax, A Little Help, C3, CAFI, Peak Pediatrics, The Village Initiative, Lakewood Police Department Navigators, Care & Share, Westside Cares, C4, Kavod Senior Care, and Neighbor Works. BIA will continue to work with other agencies interested in conducting SNAP Outreach on behalf of Benefits in Action.
6. Submit a final report by December 1, 2026.

Benefits in Action (BIA) has developed a comprehensive outreach plan designed to increase both awareness of and access to SNAP benefits among eligible Coloradans. By leveraging their strong network of community partnerships and with continued support from CDHS, BIA is well-positioned to deliver targeted, effective outreach across the state. Their approach includes on-the-ground assistance, collaboration with subrecipients, and data-driven strategies to reach underserved and hard-to-reach populations. BIA is confident that these coordinated efforts will ensure reliable SNAP outreach coverage throughout Federal Fiscal Year 2026.

Hunger Free Colorado

Hunger Free Colorado is committed to connecting eligible Coloradans to SNAP via their SNAP Outreach work. This comes in the form of partnerships, collaborations, and commitments. Hunger Free Colorado will accomplish this work via the two programs funded through SNAP Outreach: SNAP PEAS and SNAP Outreach:

- **SNAP PEAS (Partners Engaged in Application Assistance)** – SNAP enrollment training and on-going support for organizations across the state, providing funding for them as sub-recipients, hosting Peak Pro licenses, facilitating telephonic signatures, overseeing compliance, and providing ongoing comprehensive training via the Online Learning Platform.
- **SNAP Outreach** – Hybrid approach of hotline and in person mobile outreach.
- **Hotline & Referrals** – Statewide bilingual food resource hotline taking cold calls and conducting active outreach and follow-ups based on referrals from community partners, such as hospitals, clinics, and physicians. Utilizing PEAKPro, HFC assists in SNAP application services.
- **Mobile Outreach** – On-site SNAP application assistance via PEAKPro at libraries, drop-in centers, county offices, clinics and other sites frequented by low-income communities.

These strategies allow HFC to provide support in innovative ways to targeted regions. The HFC Hotline is statewide and allows staff to connect with those who are unable to travel to a physical location for reasons outside of their control (such as lack of transportation or mobility challenges). Many Coloradans experience the divide in digital access, and some lack fluency in technology. As a phone-based resource, HFC is also able to assist everyone, despite their situation. All their hybrid Hotline and Mobile Outreach navigators and specialists are fluent in Spanish. For individuals who are not English or Spanish speaking, HFC staff uses TransPerfect for interpretation. When the team members are providing mobile outreach, they are connecting with people who are already arriving at various services and locations, such as hospitals and libraries, which creates a broader reach for connection.

Data

HFC collects a wide variety of data which, when analyzed, helps them determine how to better engage SNAP eligible individuals, especially in hard-to-reach populations. The SNAP Outreach team records all hotline/mobile outreach and partner events into Salesforce and will continue to do so at a 95%-100% accuracy rate as evidenced by case and record review. Additionally, HFC will continue to use Power BI to assist in visualizing trends and identifying gaps in outreach strategy.

HFC's Client Services Data Workgroup (CSDW) is a formalized working space where various departments come together to influence the direction of HFC's outreach strategies. This workgroup will reconvene, after a short summer break, in October of 2025. The goals of this workgroup are to improve data analysis and collection, understand trends in SNAP Outreach and hard-to reach-populations to increase outreach efforts and success. Further, this group will continue to support and fine tune client surveys and client stories collection. Currently, HFC conducts short post-interaction surveys to gauge satisfaction, capture barriers, and collect success stories for program

improvement and accuracy. Additionally, HFC has deployed targeted follow-up surveys for adults age 60+ and households that are prenatal up to having children of 3 years of age. These surveys focus on tech, mobility, and health-specific obstacles. Analysis of these surveys is leading to the goal of focusing closer on these obstacles for all SNAP eligible Coloradans.

County Coordination

HFC navigators and specialists will accurately gather all important case details, including the case number, county of residence and a clear description of the client issue before determining if an escalation is warranted. Should an escalation be warranted, HFC will escalate the issue to the assigned county using Salesforce and PEAKPro data. All escalated cases will be monitored closely with follow-up within 7 business days. All escalated client cases will remain open in Salesforce until a response is received from the county or until a verifiable update is reflected in PEAKPro.

Other FNS Referrals

HFC will ensure clients have access to information on all available support services provided by FNS. Navigators and specialists will assess the individual's needs during interactions and provide information or make adequate referrals to relevant federal programs. Referrals will be completed in a timely manner, with follow-up as needed by the navigator to confirm connection to services. Any shared information or referral made will be clearly documented in the client's case in Salesforce.

Comprehensive Training

HFC will deliver comprehensive training to over 200 navigators at 46 statewide community partners in Colorado on SNAP Outreach, eligibility criteria, application assistance, and PEAK Pro through an online learning platform, as well as effective methods for evaluating and reporting program outcomes, from October 2025 through September 2026. Within the learning platform, there are quizzes and knowledge checks that simultaneously provide HFC with information on the progress their subrecipients are making and gaps in their learning. Their SNAP PEAS navigators include individuals from various linguistic, learning, and cultural backgrounds, and they created the platform with this in mind. The learning modules offer various ways to absorb learning content, including videos, audio, visuals, and written text. Additionally, the entire platform is available in Spanish to make learning more accessible for the numerous navigators whose preferred language is Spanish.

Their learning modules are designed to cater to most learning styles and are presented in bite-sized pieces, allowing individuals to complete the training at their own pace. Most participants complete the training within a week.

SNAP PEAS

In FFY 2026, HFC will collaborate with 47 subrecipients (SNAP PEAS) across Colorado to expand SNAP outreach, increase program impact, and improve access to nutrition assistance for eligible populations. Each partnership is established through an individual contract between HFC and the subrecipient, with funding provided by HFC. Grants are awarded based on each subrecipient's capacity, the populations and communities they serve, and their geographic location. These grants are tied to annual application goals, which are determined by the amount of funding received. The contracts outline all key details, including the budget, allocated funds, application targets, and compliance requirements. The contract also provides access to PEAK Pro Licenses, which is necessary for assisting clients with SNAP applications.

CDHS Collaboration

Alongside CDHS, HFC will explore and develop innovative strategies that promote long-term sustainability of the SNAP Outreach program. HFC will identify funding opportunities that support these efforts and present them to CDHS for approval for collaboration.

Program Objectives for FY 2026:

1. Hunger Free Colorado will provide telephonic and in-person application assistance to submit 15,142 SNAP applications, recertifications, and periodic reports. In addition, HFC will assist with the submission of 1,648 change reports.
2. By leveraging data collected via Salesforce entries, Client Surveys, and staff feedback, alongside innovative outreach strategies, HFC will identify and engage eligible individuals, specifically in hard-to-reach populations such as rural areas.
3. HFC will coordinate closely with county SNAP offices and relevant FNS programs to ensure that eligible individuals are enrolled in SNAP and maintain continuous enrollment, while also increasing awareness of other available federal programs.
4. HFC will deliver comprehensive training to community partners in targeted regions on SNAP outreach, basic eligibility criteria, application assistance using PEAK or other forms, and effective methods for evaluating and reporting program outcomes.
5. HFC will partner with 47 subrecipients (SNAP PEAS) across the state of Colorado in FFY 2026 to expand SNAP Outreach, increase program impact, and enhance access to nutrition assistance for eligible populations.
6. HFC will work collaboratively with CDHS to explore and develop innovative strategies that promote the long-term sustainability of the SNAP Outreach program, including identifying diverse funding sources and partnership opportunities.

Table 2: Outreach Plan Summary

Below are two tables summarizing all projects:

Project Number	Title	Geographic Area	Target Audience	Contracted or in-House?
1	Benefits in Action	Statewide Application Assistance – In person - Adams, Arapahoe, Denver, Jefferson, Gilpin, Clear Creek, Broomfield, Boulder, El Paso, Park, Teller, Bent, Baca, Kiowa, Otero, Prowers, Huerfano, Pueblo, Alamosa	• Families • Adults • Older Adults • Students • Immigrants & Mixed Status Households • ABAWD • Diverse Community members	BIA will continue to increase the number of subrecipients we work with. 4. Outreach Project Details

The table below outlines the outreach project details for the respective partners. Each project timeline will follow the Federal Fiscal year of October 1, 2025– September 30, 2026. CDHS will provide oversight, technical assistance, training, and outcome monitoring for each of the projects as the state agency. Entities providing phone application assistance will utilize CDHS’ telephonic signature protocol in accordance with FNS policy and will be monitored for compliance.

Acronyms: PE = potentially eligible HHO = household outreach SI = SNAP information IOE = informational and outreach events
IAA = in-person application assistance TAA= telephonic application assistance

Goal	Target Audience	Activity Description	Subrecipient/Role	Volunteers If yes, in what capacity?	Evaluation
Project 1: Benefits in Action In person Application Assistance	Application goal: (new apps, recertifications and periodic report forms) IAA: 3500 Change Reports goal: (address, income, phone number, household size changes): IAA - 300	All Ages, All Demographics	Benefits in Action staff meets individuals in person at our offices (currently in Lakewood, Arvada, Colorado Springs) or at any of our co-location sites throughout metro Denver, Colorado Springs, southeast Colorado Benefits in Action staff will continue to co-locate at Adams and Jefferson County human services offices to provide in-person assistance at those locations.
